Thema Safety Alert

To whom it may concern,

Please read the enclosed Safety Alert and see to that the information is spread to any relevant person within your organisation. We have found identical but non functional copies of our hydrostatic release, the Hammar H20, on the market. We do not know who the manufacturer is. These units were purchased in Mumbai, India.

If you have any information in this matter, please feel free to contact us at CM Hammar AB at any time. Help us spread this information, it will definitely save lives!

Best regards

Henrik Pålsson
